

**VOLUNTEER EMERGENCY SERVICES EQUIPMENT PROGRAM
FROM PREVIOUSLY SUCCESSFUL CFA APPLICANTS**

Brigade **Trawool RFB** District 12

Paul Kerris, Secretary of Trawool brigade says that the VESEP grant helped the brigade lay a concrete pad in front of their fire shed. It's given them an all-weather, firm working base to clean the tanker and access to their storage container. As it means they're not standing in mud when it's wet, it's a thousand times better than before the pad was laid.

It has also provided them with an area to be used for truck maintenance and brigade training activities.

Other brigades appreciate the pad as well.

Asked what they thought made their application successful Paul reported that the Captain designed a form which provided all the information, and it was presented in a neat and detailed manner. The form included a Hurt Statement detailing the positives to flow in terms of OH&S factors which would improve if successful with their grant.

2012-2013 VESEP round

Category: **Volunteer Amenities**
Item: **Concrete pad in front of the fire shed**

PAUL'S RECOMMENDED HANDY HINTS:

Get your paper work done correctly and in on time!

Be proactive and make sure you follow all procedures recommended.
