CAD PAGING TEMPLATE CHANGES

ESTA will roll out several enhancements to the paging templates during December 2018, these enhancements have been facilitated based on feedback from the field.

The enhancements include (but are not restricted to) the following;

- Event number will now be at the end of the pager message
 - Agencies notified (for multiagency events)
 - Ambulance
 - Police
 - Rescue
- Alarm template has been updated to include
 - Key Peg: has been added in front of key details (where key peg details have been provided)
- EMR template has been updated to include
- Agencies notified
 - Ambulance
 - Fire EMR
 - AV case number at the end of the pager message
 - EMR ancillary page (non-emergency) does not contain patient details

Please refer to the below examples which demonstrate the full extent of the enhancements.
